

AHMAD TOBASEI

Murfreesboro, TN | ahmadtobasei123@gmail.com

EDUCATION

University of Tennessee

B.S. Computer Science; Minor in Machine Learning, GPA: 3.7

Knoxville, TN

May 2026

EXPERIENCE

Remote Sensing Research Assistant

Sep. 2024 – May 2026

SEER Lab, University of Tennessee

Knoxville, TN

- Used SLURM on the HiPerGator cluster to run Python pipelines that composited PlanetScope imagery into monthly mosaics, producing large datasets at 3 m resolution
- Fixed repeated memory and storage quota failures by changing how jobs were partitioned and how intermediate files were cleaned up, letting the pipeline finish end to end
- Applied Random Forest models for land cover classification using field survey data and used resampling methods to iteratively achieve more accurate models

Software Developer

Sep. 2023 – May 2024

Hack4Impact

Knoxville, TN

- Collaborated on a team to design and build an applicant tracking system for a nonprofit partner
- Implemented frontend and backend features using JavaScript and HTML/CSS, and connected them to database logic

PROJECTS

Fraudulent Job Posting Detector | Python, LLMs, RAG, Chrome Extension

- Created a Retrieval Augmented Generation (RAG) pipeline to classify job postings as real or fraudulent and explain each result
- Integrated the system into a Chrome extension allowing for in browser use and explanations

Automated Network Compliance & Configuration Manager | Python, JSON, Networking

- Built a system to retrieve and compare network device configurations against baseline compliance policies
- Detected configuration errors and generated remediation actions to enforce policy compliance
- Designed parsing and validation logic to support multiple device types and rule sets

Skincare Recommendation Platform | Python, React, Node.js, Firebase

- Developed a skincare recommendation platform based on user preferences such as skin type, concerns, and price
- Implemented a Python based selection algorithm connected to a React frontend and Node.js backend

Unix Shell Implementation | C, Linux

- Implemented a basic Bash like shell supporting Unix command parsing, multiprocessing, I/O redirection, and signal handling

TECHNICAL SKILLS

Languages: C, C++, Python, Java, JavaScript, TypeScript

Frameworks: React, Node.js, Flask

Developer Tools: Git, GitHub, Docker, Linux, SLURM, QGIS

Libraries: scikit-learn, NumPy, pandas, geopandas

RELEVANT COURSEWORK

Data Structures and Algorithms, Systems Programming, Software Engineering, Machine Learning, Deep Learning, Large Language Models, Cybersecurity, Biologically Inspired Computation
